Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

Non-initialed and/or non-dated alterations have been made to the oath or declaration. See 37 CFR 1.52(c).

Claim Objections

Claims 40 and 41 are objected to because of the following informalities: "...the 95th percentile pressure..." lacks antecedent basis. Correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 23, 24, 27, 33, 34, and 37 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant has not provided support in the specification as originally filed with respect to Claims 23 and 33 "...the second threshold is approximately 11,000 RPM.." the specification states that

Art Unit: 3743

the motor speed is greater than 11, 000 RPM. With respect to claims 24 and 34, "...the predetermined duration is approximately 2s..." the specification states that the predetermined duration is for more than two seconds while the motor speed is less than 6,000 rpm. With respect to claims 27 and 37, "...the second threshold is approximately 6,000 RPM..." the specification states that the motor speed is less than 6,000 RPM.

Allowable Subject Matter

Claims 20-22, 25, 26, 28-32, 35, 36, 38-41 are allowable over the prior art of record.

The following is a statement of reasons for the indication of allowable subject matter: The overall combination of the apparatus for supplying breathable gas to a patient at a positive pressure, with a servo controlled motor and impeller, a motor speed transducer configured to monitor motor speed, a snore transducer configured to produce a snore transducer signal and a timer, determining a snore transducer fault is neither anticipated nor rendered obvious by the prior art of record.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sullivan et.al. (6,770,037), discloses a CPAP device which monitors snoring patterns.
